Name of contact person: _____

Video Submission Information

Fill in this section if you are submitting a video figure or interactive video poster.

Videotape format: NTSC PAL

Length of video submission: _____ minutes _____ seconds

Technology Support Information

This form is used for planning technology support at the conference. Early information about unusual technology needs is vital for technology support planning. Most authors can use the standard technology support described below to make successful presentations. Authors are encouraged to use the standard technology to make their presentation even when they are describing other more complex systems. Some presentations will require other technology support. However, using complicated or unusual technology during presentations increases both its cost and its risk of failure. For categories with submission deadlines before September, a more detailed request regarding technology support will be included in the Author Kit.

Standard Technology Support

Computer Support

1 PC with CD-ROM and Zip drive, 1 Mac with CD-ROM and Zip drive, and the most current commercially available operating systems.

Audio Support

A clip-on, podium, or table microphone for each presenter; a connection from the computer sound output to the room audio; the ability to play audio cassettes or CDs.

Visual Support

Non-simultaneous projection of 35mm slides, overheads, NTSC and PAL video (VHS), and computer displays with resolution up to 600 by 800 pixels.

Internet Access

Is Internet access absolutely necessary for your presentation? No Yes

Other Computer and Audiovisual Support Requirements

Please list your requirements that will not be met by the standard computer and audiovisual support listed above. Examples of other requirements include the need for wireless microphones, high resolution projection (greater than 600 by 800), simultaneous projection from multiple sources, external telephone lines, workstation (rather than PC) support, etc. Please make your descriptions as specific as possible. Your request for additional support will be considered but cannot be guaranteed.
